

Student Project sql queries :

```
76 -- 31. Find the average marks scored by students in each department.
77
78 • select department, avg(marks) average_mark from students group by department;
79
```

Result Grid |  Filter Rows: | Export:  | Wrap Cell Content: 

department	average_mark
Computer Science	83.5000
Information Technology	82.6667
Electronics	79.6667
Mechanical	79.1667
Civil	73.1667
Electrical	83.3333
Artificial Intelligence	89.3333
Data Science	84.3333
Cyber Security	79.5000

```
81 -- 32. Find departments whose average marks are above 83.
82
83 • select department, avg(marks) average_mark
84 from students group by department having avg(marks) > 83;
85
```

Result Grid |  Filter Rows: | Export:  | Wrap Cell Content: 

department	average_mark
Computer Science	83.5000
